

## **HANDWRITE IN PENCIL**

### **Layout (DIV rules)**

1. Draw what the main divs will look like (usually container around header, nav, main and footer)

### **General CSS rules** (most will be rules attached to each div)

2. Mark up widths, back ground and border colors, fonts (typeface, size (em based), color)

### **In Class warm up for Project2:**

Go to webpage <http://melaniestewart.com/webdesign/sample.html> and scroll to sample idea # 7, then using a pencil draw boxes where you think the divs are, then what css rules do you think apply
