

Week 1: WEB DESIGN Intro Class

Project #1 (HTML NO CSS)

Goal

Our goal is to familiarize ourselves with Dreamweaver's code and design panel and see the relationship and get to know the code behind the website.

We will create and store our 5 webpages in a folder titled project_1.

Grading Rubrics.: 50 points available

Each of the 5 pages are worth 10 points each (as follows)

2 points for the hard copy printout (see sample)

4 points for the work

4 points for cross labeling the code and design view

1. title
2. First paragraph
3. Second paragraph
4. image

We will create 5 web pages, which will include the following

1. Title
2. Change the default background color
3. Add a few paragraphs of text and play with text formatting
 - a. Change text color
 - b. Change
4. Insert a picture
